

Kees van Veen

ABOUT ME

Kees van Veen is an extremely precise person, who pursues the highest rate of quality in his work.

He has the ability to quickly create an overview of the environment where he is situated. With this information he is able to adapt quickly and work on solutions for himself and his co-workers in order to work in an efficient and optimal way.

With his extensive experience he is able to create a "helicopter view" which will allow him to oversee the situation. He is able to quickly change / improve "agile" on his own or by implementing changes (itil) to realize improvement.

All this is done always with high standards of quality to ensure the best results.

In his approach he will show the ability to look beyond the moment and requested task, and look ahead to anticipate on what is coming and or what is impacted.

He also tries to look back to ensure documentation is in place and whenever there are gaps or it has not been provided, Kees will ensure that it is written so someone else is able to pick up later.

Furthermore he is also an excellent team player.

| Mavo, D-Niveau, De Populier. | Common | MAVO | Diploma |

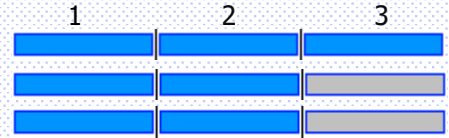

1 = Basic knowledge,
2 = Experienced,
3 = Specialist / Very experienced.

Operating systems

Linux Debian, RH, Mandrake, Suse, Slackware, Android

AIX, SCO-Unix, True64, Sun Solaris 7 / 8, Solaris i386, VMWare

Windows Server / Client (COMM programming etc)

Hardware Platforms

IBM – Intel (X-series) / PowerPC / MIPS, HP, Sun Sparc 1 /2, DEC Alpha.

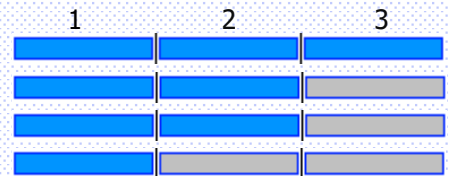

Programming languages

(B)ash / K-shell, Php, Javascript, JQuery

Perl, C++, Ansi C (C-Builder) on Windows (Win API / COMM)

Mysql, Ansi SQL, Oracle SQL, PLSQL

Java / Android, Visual Basic

Other software Windows

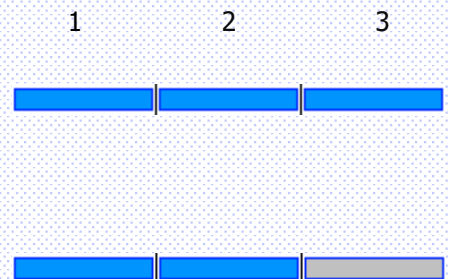

VMWare, VirtualBox, VNC, www, SMS, Exchange, Microsoft Office, Perforce, WinCVS, Exceed x, Arcserve, SAN, NAS, Citrix / ICA clients, Oracle Forms*, Reports*, SQL- Developer, etc, TOAD, APC Powershute, VM_Ware X, Symantec Veritas.

Other software Linux / Unix

Sendmail, Procmal, Exim (SMTP), Squid (Proxy), FireWall / Masquerading (IPTABLES / NAT), PPPoe / PPTP / VPN / Tunnels / OpenVPN, IMAP / Dovecot / Zarafa / Z-Push, RoundCube, Fetchmail, Apache, SSH / SSL, OwnCloud, Alfresco, Samba, OpenLDAP, Bind (DNS), SVN, CVS, LVM, mdadm Oracle DB, Hisax, Capi 2.0

GIT, GitLab, Jenkins, Clarive, Prometheus, icinga2, LibreNMS, Grafana, puppet, OpenSource / Stack, Elasticsearch, Kibana, Atlassian Suite, Alfresco, Docker, LXC, minikube, AWS / OnPrem Terraform, Terragrunt.

Other

TCP/IP, VLAN / VPN / Cisco, Netbios, NFS, PPOE, PPTP, IGMP, ICMP.

IVR, Dialogic, MusicTelecom, Quicknet, Voicetronix, Cisco Callmanager x, 2940, 2960, Skinny SIP, 3COM IP-phones, RTP, H323, H245, SIP, IAX2

Methods

ITIL, CMMI, Yourdon, Hatley/Pirbhai, Ward/Mellor, DFD, UML

Kees van Veen

**WORKING
EXPERIENCE**
Dec 2018 - Now**TUI – Malaga - Automation | DevOps**

Keywords / technologies

Citrix Netscaler, Checkpoint, VMWare, AWS, OpenShift, OpenSource, Puppet, SLES-x, RedHat, Debian, Shell, Perl, PHP, FPM, Apache, Icinga, Prometheus, Grafana, Librenms, Tomcat, Atlassian Jira/Confluence, Jenkins, AD, Mysql, Postgress, LCM, Performance.

Activities

Maintaining / supporting existing legacy High volume web applications (LAMP/ php / rest). Besides keeping the applications running, also participated in improving on current environments by extending the Puppet environment in private / public cloud solutions as well as preparing / building complete new environments, including tooling like AWS-tools / Terraform, terragrunt, Jenkins etc.

Jan 2013 – Dec 2018**Planetzelf - Rotterdam - Automation | Sr. System Administrator – PHP-Developer**

Keywords / technologies

IBM X-Series, DTAP, Debian – Linux (HA / Heartbeat), Puppet, VMWare, shell, PHP, Mysql Cluster - DB, Availability, Development PHP- html / javascript / xml- interfaces, Revision Management, Release Management, LCM, Performance.

Activities

Maintaining / supporting the System / Application, taken from VPS onto physical Hosted Hardware. Created DTAP environment, coaching fellow developers, build 4 node mysql cluster - db, with puppet, optimized environment (query tuning etc). Provided scripting for automated release management etc, taken the system / application to a professional level.

Jan 2012 - Dec 2013**European Space Agency - Noordwijk – Space | Sr. System Administrator**

Keywords / technologies

IBM X-Series / Blade server, Sun, EMC Celerra, Checkpoint, Solaris, XEN, VMWare, OpenSource, SLES-11, Scientific Linux, RedHat, Debian, Shell, Perl, PHP, Cis-Cat, Apache, Nagios, Tomcat, Alfresco, Atlassian, Mysql, Postgress.

Activities

Maintaining / supporting existing Hard- Software solutions and consolidate solutions into a centralized managed solution (SSO- ldap/kerberos). Created several standalone platforms as units hosted on the public Internet providing specific services / solutions within ESA- Security regulations (CIS- CAT / hardening / specific Firewall setups with IP-Tables etc).

March 2008 - Dec 2011**ING Bank - Amsterdam – Finance | Operational Application Support Engineer**

Keywords / technologies

IBM - Power / Aix, EMC/SAN, Oracle 8 – 10.2, SQL, Toad, Apex, Korn - shell, Perl, PHP Autosys, Veritas, Operational support, DTAP, Availability, Development, LCM, Performance, CMDB, CMMI / ITIL(3)

Activities

Maintaining / supporting the production Ledger from ING. Participating in Development and guarding acceptance criteria for release management. Prepared an alternative Pre- production environment, called S (shadow) equipped with stubs for interfacing. Running the BANK!

Aug 2007 - Mar 2008**TomTom - Amsterdam – Retail | Sr. Php Developer**

Keywords / technologies

LAMP X86, CentOS, RedHat, Debian, MSSQL, MySql, shell, Perl, PHP, Flash, html / javascript / xml- interfaces, Design, Development, Performance, OSDN, Nagios, Perforce, VMWare.

Activities

Maintaining / supporting the public website, delivery of customer projects from start, to RFC, to Full implementation. Designed / implemented optimizations on CMS / DTAP- environment, as well as bug- fixing existing software.

Kees van Veen

**WORKING
EXPERIENCE**
Jun 2006 - Aug 2007
Boskalis - Dordrecht – Offshore | System Administrator

Keywords / technologies

X86, Embedded, Linux, RedHat, Mandrake, LAMP, OSDN, VMware, shell, Perl, PHP, Mysql, Revision Management (CVS), Deployment, Availability, Development, LCM.

Activities

Maintaining / supporting Linux developed specific Dredging applications. Consolidated Installation / run- time environments through one single media. Developed integral solution for deploying / maintaining with existing and new components for the new releases of the Ship- Software.

Apr 2006 - June 2006
Blink - Amsterdam – Telecom | System Administrator

Keywords / technologies

X86, FreeBSD, Linux RedHat, OSDN, Nagios, Shell, Perl, PHP, LATEX, Revision Management (SVN)

Activities

Updated the centralized installation scripts for deploying User Development Environments also documented this in TEX. Made preparations for new Co- location as well.

Dec 2004 - Apr 2006
OceanTelecom - Amsterdam – Telecom | System Administrator – Developer

Keywords / technologies

x86, linux Debian, Ansi C, C++, .NET, OCX, MS-SQL, MySql, Chameleon, OSDN, php, html, javascript, UMedia, Flash Player, MS-Visual, Borland CBuilder, Asterisk, VOIP, Qos, NFS, Samba.

Activities

Maintaining / supporting the production environment at system level. Upgraded / restructured the hardware setup and migrated the IVR / SMS / Payment methods developed application backend for managing CDR's and affiliate programs into a new Website design equipped with new CMS.

Aug 2004 - Nov 2004
Planhold - Amsterdam – Service provider Triple play | System Administrator

Keywords / technologies

X86, IBM (power PC), Linux Debian, Mandrake, Suse, Win32 (2k), OSDN, DVB-S, triple play, TV, IP- Telephony, Inet, High performance, 1 GB, IGMP, Ansi C, C++, DVB_Stream, VideoLan, MySql

Activities

Created an advice document for Video distribution. In order to be able to bring out the advice a demo setup was realized where I configured a streamlined kernel specifically build for X86 and or the Dreambox. Windows clients served as the STB (Set Top Box).

Nov 2003 - Nov 2004
IPBX – Own Company – Telecom / IP-Telephony | Developer

Keywords / technologies

Linux, Debian, Win32, OSDN, Ansi C, C++, Asterisk, TOS, Qos, VPN, E1/T1, ISDN, php, MySql, HTML, Bash

Activities

Development / customizing server and client side applications, porting Windows <=> Linux client software, and creating back-end for provisioning / billing with web interfaces.

Jan 2002 – Nov 2003
Charmed CTI – Sassenheim - Telecom / IP-Telephony | System Administrator

Keywords / technologies

Linux, Debian, Windows, Terminal Server, Citrix, MS-SQL / Access, ODBC, VOIP networks setup-ed with CISCO 2950, Borland, CRM-Applications, Delphi / COM, DCOM, php, html.

Activities

Restructured Internet facilities: Firewall, Mail, WWW, en Virtual Private Networks, home work facilities. After setup / deployment of the facilities also streamlined the services, like helpdesk, support, back- office applications.

**WORKING
EXPERIENCE****Jan 2001 – Dec 2001****SFS Pensioenen - Rijswijk - Automation | System Administrator**

Keywords / technologies

VMS, x86, NT, SMS, Apache, Cygwin, Oracle 8x, Workflow, DIS, DMS, Bash, SQL, HTML, ITIL, Functional Design.

Activities

In boarding / modify several development / test environments from former supplier in order to be able to incorporate into existing environment. Modified DTAP street environment, smoothing out differences and improved FAT/PAT tests. Delivered the application in a maintainable way for the production environment.

May 1998 – Jan 2001**Orades B.V. - Heemstede - Automation | Head Internal IT**

Keywords / technologies

NT4.0, Linux Debian, Solaris i386 (v7 / 8), Oracle 8, Bash, Ansi C, HTML, perl, Oracle Forms / Reports / Enterprise Manager, Apache, ISND, Cisco Router 1700 series, Switches, 3Com

Activities

Responsible for the installation and maintaining Oracle databases 8.xx, Server / Client setup. Internet connectivity realized based for internet services over Leased line connections. Setup Co- Location for ASP purposes on Linux Debian / Solaris i386.

1995 – May 1998**Summary: Des / University**

Summary

Started with working at DES hardware Sales / Repair of personal computers. Continued on the University Campus and worked on my 10Mb Fixed internet connection as System Adm.
